James Hardie® Products with ColorPlus® Technology— Helping Build Better Homes

All the products you need

Along with the aesthetic appeal of traditional lap siding, James Hardie® offers a full product line of lap exposures, shingle, soffit and trim for a low-maintenance exterior of exceptional beauty and durability.

Professionally developed colors for you

The ColorPlus® collection features a wide range of popular colors and color combinations—each selected to match consumer preferences in your area.

Coverage you can count on

An exclusive, fiber-cement-specific paint formulation with a multi-coat, baked-on color application process ensures a consistent full-paint coverage—one that cannot be duplicated by a third-party pre-finisher or on-site painting.

We protect you all the way

Our proprietary paint also includes a special coating for mar- and abrasion-resistance, while a factory-applied protective laminate protects your home's finish and color during shipping and installation.

Peace of mind you deserve

James Hardie backs its siding up with up to a 50-year product warranty and the ColorPlus finish with a 15-year warranty. All from a single source—the manufacturer of America's #1 brand of siding.

The Total Installed Value you—and your customers—are looking for

James Hardie siding products with ColorPlus technology help you build a home of enduring beauty and lasting value. From the unmatched durability of our fiber-cement material, to our proprietary ColorPlus finish and application process, we create a more valuable exterior every builder and homeowner can appreciate. A beautifully designed, truly distinctive home that will sell faster and bring you more profit. James Hardie—building better homes.

It's no contest. For long-lasting beauty and value—with less maintenance—James Hardie fiber-cement siding is your smartest investment. For more information, visit www.jameshardie/colorplus.com
